

Overview of Energy Usage by the AGO in 2017

In relation to Office energy usage in the Merrion Street Office, most of the energy consumption in the building is for space heating, air conditioning and hot water. Lighting, office equipment and catering equipment account for the vast majority of the remaining office energy consumption. In 2017, AGO consumed:

- 373 MWh of electricity;
- 369 MWh gross of natural gas fuels,
- 7.6 tonnes of wood pellets of renewable fuels (wood chips).

Actions undertaken in 2017

- In 2017 the AGO continued its ongoing programme in relation to raising awareness among staff in order to effect reductions in energy usage where possible.
- The AGO reported data via the online SEAI Monitoring and Reporting system. The required data was submitted by the target deadlines.

Actions planned for 2018

- To continue with a programme of raising awareness of staff regarding energy consumption and areas where efficiencies can be realised.
- Examine and where practical implement initiatives that will lead to further reductions in Energy consumption.

Overview of Energy Usage by the CSSO in 2017

The CSSO consumes energy at two office buildings at Osmond House, Ship Street Little and at 3 Chancery Lane.

In 2017 the CSSO consumed 1095.47 MWh of energy consisting of:

596.27 MWh of electricity

499.20 MWh of fossil fuel (Gas)

Actions undertaken in 2017

- In 2017 the CSSO continued its ongoing programme in relation to raising awareness among staff in order to effect reductions in energy usage where possible.
- The CSSO reported data via the online SEAI Monitoring and Reporting system. The required data was submitted by the target deadlines.
- The CSSO had continued engagement with the Public Sector Mentoring Programme.
- The project to upgrade lighting in Osmond House to LED lamps was started.

Actions planned for 2018

- To continue with a programme of raising awareness of staff regarding energy consumption and areas where efficiencies can be realised.
- To complete the upgrade of the lighting in Osmond House to LED lamps.
- Examine and where practical implement initiatives that will lead to further reductions in Energy consumption.
